Description:	EC50: Launch Announcement
Reason for Change:	PMB-10514: Announcing the Launch of EC50

1. Introduction

Introducing the thinnest, lightest Zebra mobile computer yet — the EC50 WiFi enterprise mobile computer. Designed to be individually assigned to workers, the EC50 gives your customers the power to meet the needs of every moment by delivering the best of all worlds — the great smartphone look and feel workers want in their business device, the durability for all-day everyday business, plus all the business features the users need to drive personal productivity, collaboration and device value to a new high.

The EC50 is ready for the future with support for payment options and RFID. Your customers get extreme flexibility — in just seconds, the same device that slips into a pocket can turn into a full workstation, a gun-style device that brings extreme comfort to scan intensive tasks, and a two-way radio or a PBX handset for better collaboration via voice and text. Easily find lost and misplaced devices, even when they are powered down, with Device Tracker.

The ability to purchase these devices for four years eliminates the complexities of managing different models with different platforms. And the optional gold standard in support is available to keep your customers' devices up, running and in the hands of their workers. The EC50 — the individually assigned smartphone-style enterprise mobile computer that is all business. Some feature highlights include:

- Thin and light-weight smartphone-like form factor that is small enough to fit in your pocket, yet powerful enough to multi-task in Retail, Hospitality, and Ancillary Healthcare use cases
- Same SD660 platform across the Zebra mobile computer portfolio
- Secondary BLE for finding your EC50, even when the device has a depleted battery or is powered off (Device Tracker solution and licensing updates will be announced in separate notification / PMB in Q4 2020)
- Two Scanning Configurations:
 - Integrated SE4100 scan engine
 - No scanner configuration - for low scanning use cases via rear camera
- High capacity 3060 mAh and 4180 mAh rechargeable batteries (user accessible, to replace worn / old batteries)
- 5 inch HD display
- Integrated NFC
- Android 10 OS at launch, upgradable to Android 11 (Support for future Android OS releases past Android 11 are subject to Qualcomm validation)

6. LifeGuard for Android

Recently Zebra introduced LifeGuard™ for Android™ (LG) representing an Operating System (OS) security support model for select Zebra Android products covered by a Zebra OneCare active contract. (Read about LifeGuard as part of our [Mobility DNA Solution](#)).

LG is available on the EC50 and for devices covered by a Zebra OneCare active contract, it includes the following support:

- 1) **Extended Security Service Life** - Security updates under LG is based on the device life cycle. Under LG, security patches are made available for the product hardware service life. For Zebra products that is either 6, 8, or 10 years. This is well beyond the security support provided by Google. Extended security support significantly lowers customer Total Cost of Ownership (TCO) by enabling devices to stay in service for a longer period of time.
- 2) **Timely, Periodic Security Updates** – customers receive security updates as frequently as monthly or quarterly (depending on the platform lifecycle). Having the latest updates on a regular cadence enhances portfolio security while making update logistics more manageable.
- 3) **Security Support Through OS transitions** - when Zebra releases a new Android OS, quarterly, LifeGuard updates for the older OS continues for a period of 12 months. Referred to as an OS Transition Period (OTP), this maintains the security of the customer portfolio during the transition to a new OS release.

7. Zebra Services

Constant, peak performance and device uptime. That is the upside of protecting your Zebra investment while also reducing device vulnerabilities with our Zebra OneCare™ support services. Eliminate unexpected disruptions and unbudgeted repair expenses and so much more. You get comprehensive coverage, technical support, software and LifeGuard security updates, and cloud-based visibility into your contracts, repair data, tech support cases and more. Zebra OneCare provides:

- Priority access 8x5 local time live-agent technical support and 24x7 access to Zebra’s online Support Center << www.zebra.com/support >
- Access to Software/firmware updates including LifeGuard™ security updates
- Configurable cloud-based visibility into your contracts, tech support cases, LifeGuard Analytics report, and repair data including repair lifecycle, ontime delivery, repair return rate, repair repeat and top repair metrics with VisibilityIQ™ OneCare™
- Repair Services with 3-day depot turnaround repair time and Advance Device Replacement options

And to address business-critical needs, you can optimize your customer’s support service plan with additional flexible Options where available:

- **Commissioning Service Option** – customers receive their devices ready to go, out of the box, back from repair with their settings, software, and applications.
- **Battery Maintenance Option** – extends coverage to include batteries. We’ll test all batteries and supply standard life replacements for those batteries that cannot reach a minimum 80% charge while being tested.
- **Battery Refresh Option** - your customer’s devices will need a new battery at some point in time. Add this option to your service agreement so your customers get a single consolidated shipment of replacement batteries, of type specified by the part number ordered for each Product, to be made to a Customer-designated location at a predetermined time.
- **Expedited Logistic Options include:**
 - **Expedited Collections Option** - entitles the customer to request prepaid shipping labels and to schedule carrier pick up using the Zebra RMA portal. The shipping service from the Customer to the Zebra Repair Center is Express, which in most cases is next business day. Zebra arranges transport, bears shipping costs and risks to the Zebra Repair Center. Return shipment of repaired product is economy service from the Repair Center
 - **Expedited 2-Way Shipping Option** - provides Express shipping of devices into Zebra’s Repair Center and also provides Express return shipping of the repaired devices from Zebra’s Repair Center back to the Customer. Customer requests pre-paid shipping labels and schedules carrier pick up from the Zebra RMA portal. The shipping service in both directions is Express, which in most cases is next business day. Zebra arranges transport and bears shipping costs and risks to and from the Zebra Repair Center.

Zebra OneCare support services are available to keep the new EC5XTouch Computers operating at peak performance throughout its lifecycle; The following Zebra OneCare Support Services are the recommended services and part numbers available. 8. Software Support and Entitlement Process

Except for warranty coverage, which will be as specified below, End User Customers are required to have a valid Zebra OneCare Technical Support and Software (TSS), Special Value, Essential or Select service agreement in place to be entitled to any restricted software including Printer Profile Manager Enterprise, Enterprise Connector, LifeGuard, telephone and e-mail support. End user Customers will need to provide product information when initiating their support requests, including the serial number of the product configuration(s) for which they require restricted software and/or support.

For warranty coverage, software is licensed “as is” with no warranty. However, unless otherwise stated by Zebra in the product warranty exceptions list at https://www.zebra.com/content/dam/zebra_new_ia/en-us/support-and-downloads/general/Warranty/product-warranty-exceptions-list.pdf or in a sales agreement

between Zebra and End-User Customer, for restricted software and for licensed demoware, as identified at zebra.com, End-User Customer may, for a period of 90 days from when the instance of Software or Hardware are first shipped by Zebra or, with proof of purchase or license, from the purchase date whichever is later, obtain if available, releases, from <https://www.zebra.com/us/en/support-downloads.html> and technical support.

End User Customers who wish to purchase a services agreement can do so through the normal channels that they currently use to purchase Zebra products and services. Requests to download restricted software releases are completed through Support and Downloads pages at <https://www.zebra.com/us/en/support-downloads.html>. For purposes hereof End User Customer means the original user of the product.

10. Frequently Asked Questions

Q. What product in the Zebra portfolio is EC50 replacing?

A. The EC50 is a new category of individually assigned enterprise mobile computer in a smartphone-like form factor and hence not replacing any of the existing products within the Zebra portfolio.

Q. What OS will the EC50 release with?

A. The EC50 will release with Android 10.

Q: How can I charge my EC50?

A: There are a few different charging solutions. See section 2B for exact part numbers.

- USB C cable with wall adapter
- Low cost single slot charge only cradle
- Single-slot charge cradle with Ethernet connectivity
- 4-slot charge cradle (non-locking)
- 4-slot charge cradle (locking)
- Workstation docking cradle
- 5-slot Ethernet & Charge Cradle

Q: Do I have to send the EC50 back to Zebra or find an authorized Services partner to change old worn-out batteries?

A: No, the EC50 allows end-user access to the battery for easy replacement of worn-out batteries or to switch to the extended battery.

Q: Is there a workstation cradle option for the EC50?

A: Yes, there is a workstation cradle kit, part number CRD-EC5X-1SWS-01, that can be purchased separately allowing connectivity to monitor, keyboard, printer, and other peripherals to provide a desktop experience.

Q: Is there a spare battery charger for the EC50?

A: No, there is no method to charge the battery outside of the device itself. The EC50 is intended to be individually assigned, however end-user does have access for easy replacement of worn-out batteries without having to send the device in for Services.

Q: Is there a version of the EC50 without a scanner?

A: Yes, we have a version of the EC50 without a scanner populated. In this version of the product line the scan keys are programmed to activate the rear camera for scanning.

Q. Will there be WWAN versions of the EC5X?

A. Future updates and associated DN and PMB will address availability of WWAN SKUs (EC55).

Q. For scan intensive use case, will there be a trigger handle accessory offered with the EC5X?

A. Yes, as noted in section 2B, TRG-EC5X-SNP1-01 is offered as a snap-on trigger handle that work with any EC5X with a 2-pin or 8-pin rear I/O connector. Devices with “no rear I/O connector” are NOT compatible with this trigger handle. As the rear I/O connectors are not field replaceable, please plan accordingly.

Q. Will there be RFID capability offered with the EC5X?

A. Future updates and associated DN and PMB will address availability of RFID optional sled. SKUs in section 2A that denote “8-pin back connector” in description are RFID-ready. As the rear I/O connectors are not field replaceable, please plan accordingly.

Q. What is the life cycle of the EC5X Series?

A. EC5X series is a 4x4 product. Four years of sales, and four years of service beyond the end of sale date of the device.

Q. What is recommended for cleaning an EC50?

A. Please see this link for cleaning agents and processes.
