Description:	ZT410 & ZT420: End of Sale (EOS) Announcement for APAC region
Reason for Change:	PMB-SPG10352 Rev C: End of Sale of ZT410 & ZT420 and Transition to ZT411 & ZT421

1. Transition Overview

The ZT410, ZT420, ZT410R and ZT420R printers are being transitioned to the new ZT411, ZT421, ZT411R and ZT421R printers. All ZT411 and ZT421 models include a large color touch display, versatile connectivity options, Zebra’s Print DNA software powered by Link-OS and are available in three print resolutions and two print widths for a wide variety of applications. Please see DN-AIT10267 for details on the ZT411 & ZT421 launch.

Please note the following regarding replacement SKUs:

- Configurations generally match those of the ZT410 and ZT420 SKUs; the equivalent SKU can typically be determined by changing the fifth digit of the current SKU from “0” to “1” to match the new SKU.
- Some ZT410 and ZT420 SKUs were discontinued for lack of demand. New SKU configurations can be considered if request meets minimum volume requirements - please consult product management (see contact information at the top of this notice).

Custom SKU configurations (ending in other than -0Z) and bundle part numbers beginning with DS which include custom printer SKUs will be given a minimum of six months additional sales to allow sufficient time to transition to the new ZT411 & ZT421 printers. Customers should begin the transition process as soon as possible by contacting the AIT Professional Services Group (CAG). In addition, it will be important to forecast through the Zebra sales team all ZT410 & ZT420 custom SKU demand beyond the channel (-0Z) SKU end of sale date as lead times may increase after that date.

3. Accessories and Peripherals: Transition Timeline and Mapping Table

All ZT410 & ZT420 options, accessories and media handling parts will be compatible with ZT411 & ZT421 printers with the exceptions of: The 802.11n WLAN Option Card and the aftermarket Peel Assembly Kit. The ZT411 and ZT421 will operate with the 802.11ac WLAN Option Card only. Also, the ZT411 & ZT421 have a new aftermarket Peel Assembly Kit which includes sensors in the kit which are required for the ZT411 & ZT421. The Peel Assembly Kit is used to upgrade in the field when not ordered from the factory or for maintenance.

4a. Service and Support: Hardware End of Service Life Policy

Zebra Technologies Corporation and its affiliates (“Zebra”) will provide service and support for products manufactured/ sold by Zebra for a period of 3, 4, or 5 years, commencing on the last day of the product’s final shipment.

Zebra will make reasonable, commercial efforts to continue to repair and support products beyond the five-year period at Zebra’s option:

- To meet contract commitments
- Where a significant commercial requirement is identified
- Where Zebra determines in its sole and absolute discretion that there is sufficient commercial reason to warrant continuance of repair and support

Should technology used in the product become discontinued, obsolete, or no longer available in the public domain, making parts or assemblies no longer available for these reasons, Zebra at its discretion will evaluate the impact and if significant, consider the feasibility and economics of a design change to enable continued repair.

The End of Service Life Period may be changed at Zebra’s sole and absolute discretion.

Customers who wish to purchase a Zebra Services Contract can do so through the normal channels that they currently use to purchase Zebra products and services.

- **Partners:** Visit the Products, Services & Supplies tab of [Partner Gateway](#)

4b. Service and Support: Software End of Service Life Policy

For software applications that have been announced End of Sale (EOS), conclusion of support for these products follows a defined timeline beginning from the product End of Sale announcement (the “EOS Announcement”). For customers with products covered by a Zebra services agreement (the “Support Contract”) at the time of the EOS Announcement, the software maintenance portion of its Support Contract, as defined in the Service Description Document applicable to the product EOS (the “Software Maintenance”), will continue for up to twelve (12) months from the EOS Announcement date. Zebra reserves the right, at its sole and absolute discretion, to end such Software Maintenance earlier than this date should conditions warrant.

For customers with products covered by a Support Contract at the time of the EOS Announcement, Technical Support, defined as telephone and e-mail support through Zebra’s Customer Support Center, continues through the completion of the customer’s software Support Contract, regardless of the availability of Software Maintenance on the EOS software product.

Customers with products covered by a Support Contract that are not using the most current release of the applicable software product on the EOS Announcement date may update to the most current release after the EOS Announcement, subject to this Statement and the terms of the Service Description Document applicable to customer's Support Contract.

As of the software product EOS Announcement date, multi-year Support Contracts for that product will no longer be available from Zebra. New customers may purchase multi-year contracts up to and including the EOS effective date. Any request for a multi-year software Support Contract for an existing customer must be approved by Zebra Services and the applicable Zebra product group(s).

As of the EOS Announcement date, only annual Support Contracts and one-year renewal Support Contracts will be available without a special approval, as indicated above. Availability of Software Maintenance will be as described above. Technical Support, as described above, will continue up until the conclusion of the customer's Support Contract.

5. Frequently Asked Questions

1. What are the differences between the new ZT411 and ZT421 printers compared to the current ZT410 and ZT420 printers?

The new ZT411 and ZT421 printers have many new standard features, including support for the latest Link-OS architecture, a color touch user interface, printhead element out detection, Bluetooth 4.1, dual adjustable transmissive and reflective sensors, dual USB host ports, and applicator card compatibility. Please refer to the Technical Specifications for all changes.

2. Will the ZT411 and ZT421 function as drop-in replacements for the ZT410 and ZT420 printers?

Yes! While the ZT411 and ZT421 printers have many new features, they will function as drop-in replacements for the ZT410 and ZT420 printers, respectively.

3. Will all options from the ZT410 and ZT420 be compatible with the ZT411 and ZT421 printers? All ZT410 & ZT420 options, accessories and media handling parts will be compatible with ZT411 & ZT421 printers with the exceptions of: The 802.11n WLAN Option Card and the aftermarket Peel Assembly Kit. The ZT411 and ZT421 will operate with the 802.11ac WLAN Option Card only. Also, the ZT411 & ZT421 have a new aftermarket Peel Assembly Kit which includes sensors in the kit which are required for the ZT411 & ZT421. The Peel Assembly Kit is used to upgrade in the field when not ordered from the factory or for maintenance.

4. Are there any new options and accessories for the ZT411 and ZT421 printers?

Yes. The ZT411 and ZT421 will use the 802.11ac WLAN Option Card (see FAQ #3). In addition, the new printers will also support the use of the Applicator Option Card, which will operate in the same manner as it does with Zebra's other compatible industrial printers. Also, the ZT411 & ZT421 have a new aftermarket Peel Assembly Kit which includes sensors in the kit which are required for the ZT411 & ZT421. Finally, a protective adhesive film is available for the display and keypad to afford additional protection in harsh environments.
