

WHAT IS THE DS9300 SERIES?

The presentation scanner that fits anywhere, scans everything and is built for all-day reliability.

The DS9300 Series is the little presentation scanner with big functionality. With its near-zero footprint and stylish aesthetics, the DS9300 Series fits anywhere — from trendy boutiques to convenience stores with limited real-estate at the checkout counter. Rapid-fire, best-in-class swipe speeds and unparalleled performance on challenging barcodes keep lines moving. You also get a durable design built to handle everyday drops, bumps and spills.

WHY SHOULD YOU BUY THE DS9300 SERIES?

TOP 5 CUSTOMER BENEFITS

1

Big performance in a small package.

Leveraging an 800 MHz processor, high resolution megapixel sensor and Zebra's exclusive PRZM Intelligent Imaging technology, the DS9300 Series instantly captures virtually any printed and electronic barcode, even the most challenging ones, to keep checkout lines moving smoothly. And with swipe speeds up to 50% faster than competitive scanners and the largest field of view in this class, the DS9300 Series can capture barcodes as fast as they are presented.

2

No space at your POS? No problem.

With its near-zero footprint, the DS9300 Series can fit in the most space-constrained counters — and still leave you plenty of room to display impulse items. The 45° angle cable connector reduces the already tiny footprint, even when the scanner is tilted forward. And the modern and stylish design of the DS9300 Series is at home everywhere, from the trendiest boutique to a petroleum convenience store.

3

One scanner does it all.

What can associates do with the DS9300 Series? They can parse driver's licenses to streamline age verification or a loyalty application. They can read invisible Digimarc barcodes for faster checkouts. They can capture high density barcodes on small items, deactivate EAS tags, capture images of checks, read multiple barcodes at once, collect data from passports with OCR and much more. And with Zebra's 50-year legacy of innovation and R&D investment, you can count on new features over the life of your scanner.

4

A scanner you can count on for years.

The DS9300 Series is designed to endure the rigors of everyday use for maximum reliability and a low total cost of ownership. IP52 sealing, a concealed beeper hole, and elevated circuitry and cable connector protect against spills in QSRs, convenience stores and more. And the scanner is built to survive 5 ft./1.5 m drops to concrete and 1,000 tumbles in a 1.5 ft./0.5 m tumbler, giving you dependable performance in spite of the everyday spills, drops and bumps.

5

DataCapture DNA simplifies the entire scanning experience.

Zebra DataCapture DNA provides powerful new features that no competitive product can offer — features that not only make the DS9300 Series the best in the industry, but also the easiest to use. Management, visibility, productivity and app development tools strip away the complexity for scanner deployments of any size. And Zebra OneCare service sets the bar for device support, covering literally everything for just pennies a day.

APPLICATIONS

Retail

- Point of sale
- Mobile coupons/loyalty
- Driver's license parsing
- Cigarette/liquor tax verification
- Checkpoint EAS

Hospitality

- Point of sale
- Mobile coupons/loyalty
- Ticket processing

Quick Serve Restaurants

- Point of sale
- Mobile coupons/loyalty
- Driver's license parsing

Transportation

- Point of sale
- Ticket processing
- Gate/business lounge check-in
- Driver's license parsing
